Business Competence in Europe.

Studying.
Working.
Living.
In Europe.

Europe – Economy – Mobility

Every year Europe grows closer together; in political, social and most importantly in economic aspects. As a result of this development, there are challenges which require a particular understanding of economic relationships in a unified Europe. These challenges require a readiness for mobility, extensive soft skills and business competence in order to be able to comfortably deal with international business questions.

The European Business Baccaureate Diploma (EBBD) equips students and adult learners with the necessary competence to master these challenges.

With the EBBD, young students and adult learners will receive a harmonized and accredited European qualification going beyond the national frameworks for professions in the field of business administration. Thus the graduates of the EBBD programme increase their opportunities in the job market.

Business Competence 'European Style'

In the future, the European Economic Area will require even broader and more particular competences. The EBBD portfolio has been specifically designed with these competences in mind; the EBBD supports the European economy by educating a top qualified workforce.

Graduates receive an additional, internationally renowned certificate, which also serves as preparation for academic studies with a European focus.

COMPETENCES IN THE PROGRAMME

- » Soft skills
- » Business competence
- » Competence in international business fields
- » Europe Competence – CFEC
- » Competence in various foreign languages
- » Competence to work on economic questions in a foreign language – CLIL
- » Application of work related competencies during practical training in a foreign country
- » Problem solving competence in the framework of business projects and simulations

European Business Bacallaureate Diploma for All

The diploma is for all students in vocational education and training of upper secondary business education in Europe. The diploma requirements make it possible to take into account the needs of adult learners and enable the validation of non-formal and informal learning.

With the help of the EBBD young and adult graduates with vocational qualifications and a university entrance qualification can easily and uniformly demonstrate their capabilities in the EU region.

Europe is Working Together

International partners from European countries have teamed up in two EU-projects and jointly developed the European Business Bacallaureate Diploma. It is based on a portfolio that ascertains the above mentioned competences.

For further information see: www.eurobacdiploma.eu

Schools and other educational institutions that meet the portfolio's demands and are able to implement it can be accredited as EBBD school/EBBD vocational education institution. The non-profit organization European Business Bacallaureate Diploma e.V. is in charge of carrying out the accreditation of interested schools and other vocational education institutions and establishing the rules for their certification. In Austria the Austrian Federal Ministry of Education and Women's Affairs accredits the schools.
